## LETTER OF INTEREST

**Date:** 12/05/2016

**To:** Kyrill levseiev, Ultima Creative USA CEO, Svitlo CEO.

**From:** Gary TABACH CAPTAIN(06)(R) U.S. Navy, the member of AMSUS.

Dear Mr. levseiev,

I had reviewed all the materials related to the SEDA (Smart Efficient Damage Alarm) project including presentation, technical description and general concept. I also reviewed the NATO MYP Application related to the USGS (Uniform Sensor Grid System) project, which is the first stage of the SEDA. I found that the complex integrative approach of the SEDA is demanding and challenging, especially in the view of data processing. I understand that the project is at the seed stage at the moment, however, I see the promising future of this technology especially in potential integration with the existing Future Soldier systems. I understand the proposed project outcomes and am confident that the team managed and lead by you will attain the declared goals.

In consideration of my professional experience as Chief of Staff of NATO Military Liaison Mission, I have all reasons to declare that the successful development and deployment of this project will lead to the following results:

- additional defense of infantry soldiers on the battlefield
- advantages in medical triage of the wounded soldiers on the battlefield
- it will help to save lives of wounded fighters
- it will provide tactical advantages during the combat
- it will increase chances of success of military defense missions
- it will improve morale of the soldiers
- it will lead to new and important scientific results

The results listed above are very important military advantages, which provide inestimable benefit in the Future Soldier concept development.

I'm accepting the NPD position in the terms of NATO SPS program. I will provide all necessary support as NPD to help you develop and deploy the first stage of the SEDA. Moreover, I'm highly interested in the project's success as it strongly correlates with the mission of my company, Grand Terra Trading, where I hold the position of the Director of US operations.

As a former Dean/Deputy Director of NATO defense against terrorism center, and an Assistant Professor at the Uniformed Services University of the Health Sciences (USUHS) as well as a member of the Association of Military Surgeons of U.S. (AMSUS), I am confident that these organizations, among others, which I have close links to, will be very interested in becoming end users in the NATO SPS terms on the USGS project and cooperate with Svitlo to provide feedbacks and possible usage of project's outcome.

---

Gary TABACH, CAPTAIN(06)(R) U.S. Navy,

**Board of Directors, Philadelphia Veterans Comfort House, USA,
